

Got drought? SMARTSCAPE®!

Did you know 40 to 60% of your water bill is used for irrigation. Reduce water bills - SmartScape!

Native and adapted plants use 80% less water and tolerate our heat!

Minimize runoff. Reduce water bills - SmartScape shows you how.

Develop deep roots!! Deep, infrequent watering helps plants thrive!

50% of your irrigation can be lost to evaporation. Water between 8 p.m. and 10 a.m. to avoid this.

Use 3" of organic mulch in bed areas to reduce watering frequency.

Leave grass clippings on the lawn to help maintain moisture.

Measure how much water you're placing on the lawn to ensure you aren't watering too much!

Don't water in the rain - install a rain sensor on irrigation systems.

Water every 5 to 7 days in the summer and every 15 to 20 in the winter.

Drip irrigation is more efficient; it delivers almost 95% of the water to plants.
